

Laminate

Tread & Riser information
(required)

Nosing information
(optional)

1. Only enter **Tread & Riser** information in the left section of the drawing *unless* a special nosing size is required.
2. **A** is the top width of nosing. **A = 4"** unless requested otherwise.
3. **a*** is the restricted top width measured from the visible top surface of the adjacent plank to the tread edge. This is an optional dimension *only* required if the nosing is being installed when the adjacent plank is already in place. Do not provide **a*** if either **Tread Overhang** or **A** is provided.
4. **B** is the face (drop) size. Do not provide **B** when **Tread Thickness** is provided or a special **B** size is required.
5. **C** is the return depth. Do not provide **C** when the Tread and Riser information is provided. **Tread Overhang** is measured from the tread edge to the riser without flooring. **C=7/8"** is standard when flooring is installed on the riser. **C=7/8"+(Flooring Thickness)** when no flooring is installed on the riser.
6. Use separate order sheets for different nosing profiles.
