

**Vinyl, glue-down**

Update dimensions,  
*if* custom

- A** is the top width. **A** is normally the balance of the plank width, **A = (Plank width) - B**, unless requested otherwise. Do not provide **A** when **a** is provided.
- a** is the top width measured inside. Do not provide **a** when **A** is specified.
- B** is the outside measurement of face (drop) size. **B = 2"** unless requested otherwise. Do not provide **B** if **b** is provided.
- b** is the inside measurement of the face (drop). This measurement is useful when the nosing must cover a tread board or a certain top section of the riser. Do not provide **b** if **B** is provided.
- Use separate order forms for different nosing profiles.
