

Vinyl, click

- A** is the top width. **A** is normally the balance of the plank width, **A = (Plank width) - B - C**. Do not provide **A** unless special size is required.
- a*** is the restricted top width measured from the visible top surface of the adjacent plank to the tread edge. This is an optional dimension *only* required if the nosing is to fit a previously installed adjacent plank. Do not provide **a*** if either **Tread Overhang** or **A** is provided.
- B** is the face (drop) size, inch. **B = 1-1/2"** unless requested otherwise.
- C** is the return depth, inch. **C = 1"** unless requested otherwise.
- Use separate order forms for different nosing profiles.
